Professional

Summary

Computer Engineering student with a strong interest in cybersecurity and SOC operations. Hands-on experience in log analysis, authentication monitoring, basic Python-based tools, and security fundamentals. Familiar with networking concepts, Linux commands, and web security basics. Seeking an entry-level Cybersecurity or SOC Analyst Internship to apply foundational skills and gain real-world security operations experience.

Experience

Tata Cybersecurity Security Analyst Job Simulation on Forge

Virtual

July 2026

- * Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
- * Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
- * Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

Deloitte Australia Cyber Job Simulation on Forge

Virtual

May 2026

- * Completed a job simulation involving reading web activity logs
- * Supported a client in a cyber security breach
- * Answered questions to identify suspicious user activity

AIG Shields Up: Cybersecurity virtual experience program on Forge

Virtual

August 27, 2026

- * Completed a cybersecurity threat analysis simulation for the Cyber Defense Unit, staying updated on CISA publications.
- * Researched and understood reported vulnerabilities, showcasing analytical skills in cybersecurity.
- * Drafted a clear and concise email to guide teams on vulnerability remediation.
- * Utilized Python skills to write a script for ethical hacking, avoiding ransom payments by bruteforcing decryption keys.

Education

Rizvi College of Engineering, Mumbai University

9.87 GPA

B.E in Computer Engineering

Projects

Smart Network Security Monitor

2026

•

Developed a cybersecurity-focused network monitoring platform for discovering and tracking devices connected to a local network.

- Implemented ARP-based network scanning using Scapy to identify active devices and maintain a centralized device inventory.
- Built trust management functionality to classify devices as trusted or unknown and generate security alerts for unrecognized devices.
- Designed a SOC-style dashboard featuring authentication, security event logging, risk classification, active alerts, and network security health monitoring.

PolicyLens – NLP-Based GRC Compliance Assistant

2026

Python, NLP, Streamlit, spaCy, scikit-learn, Sentence Transformers

- Developed an NLP-based prototype to analyze information security policies and assist with GRC compliance review.
- Implemented policy document processing, security-control extraction, compliance gap identification, and policy-focused question answering.
- Used NLP techniques including text preprocessing, semantic similarity, information extraction, and document analysis to identify covered and missing security controls.
- Designed an interactive dark-themed dashboard for compliance scoring, control assessment, document insights, and policy analysis.

Phishing Email & URL Analyzer

2025

Python, Flask, JavaScript, REST API

- Built a full-stack Flask web application implementing a rule-based risk-scoring engine with **17 phishing indicators** (8 keyword/NLP-based, 9 URL-structure-based) to classify inputs as Safe, Suspicious, or Phishing.
- Designed a **RESTful JSON API** and an interactive dashboard front end with real-time analysis, an animated risk-scoring gauge, and session-based scan history.
- Validated detection logic against a labeled dataset using an automated test suite, achieving **91.7% classification accuracy**; documented methodology and results in a GitHub README.
- Applied practical cybersecurity threat-analysis and secure software development practices, including typosquatting detection via domain normalization.

Basic Cybersecurity Log Analysis

2025

Analyzed **30+ authentication logs**, detecting **5+ anomalies** (brute-force, foreign logins, multi-user attacks). Documented risks and delivered **SOC-style recommendations** including IP blocking and MFA enforcement.

Huffman-Based Text Compression Tool

2023

Assisted in building an **API-based Huffman compression tool** by **testing file-upload endpoints in Postman, validating compression-encryption outputs, and ensuring accurate decompression across multiple text files**, achieving up to **2–3× size reduction..**

Skills

Technical Skills

Log Analysis(Basic) , SIM Concepts , OWASP Top 10 (Awareness) , TCP/IP, OSI,DNS, NMap ,Wireshark, Burp Suite (Beginner), Python ,SQL (Basics), Linux Command Line

Workspace Skills

Communication, Adaptability, Problem Solving, Multitasking,Professional Behaviour, Attention to detail, Leadership, Strong Analytical Skills

Certifications

Ethical Hacking

Achievements

MGFF Scholarship Recipient Awarded MGFF Scholarship for outstanding academic performance and demonstrated commitment to personal and professional growth
Extracurricular Activities Actively involved in cultural activities and sports and also securing 1st position in them which demonstrates teamwork, discipline and coordination
Academic Achievements Stood Among the top performers in every academic year
